FOR A BETTER QUALITY OF LIFE

Moonshine Haze

Type: Sativa

Lineage: Amnesia Haze x Neville's Wreck

Seed Company: Rare Dankness

Scent: Pine Sol, Haze, Fruit Punch

Flavor: Lemons

Effects: Creative productive high

Medicinal Effects: Stress

Notes:

The sativa-dominant Nevil's Wreck from Rare Dankness Seeds crosses Arcata Trainwreck and Neville's Haze in a spicy, floral fusion that lifts depression and sharpens the appetite. Nevil's Wreck tends to exhibit uplifting, alert sativa effects, but some phenotypes may express more indica-like heaviness. With earthy flavors of lemons and citrus, Amnesia Haze is a perfect strain to start your day with a smile. The uplifting, energetic buzz is one you won't soon forget. Its genetics have been traced back to the South Asian and Jamaican landrace strains, and this Cannabis Cup winner (1st place 2004, 1st place Sativa Cup 2012) has since been popularized in the coffee shops of Amsterdam.

Afterlife OG

Type: Indica-dominant hybrid

Lineage: Ghost Rider OG x Starfighter F2 TA

Seed Company: Exotic Genetix

Scent: Lemons, pine, sweet

Effects: Uplifting feeling, Minor sedation.

Medicinal Effects: Anxiety, Depression

Notes:

The After Life project took over a year to accomplish. Now not only is the powerful Ghost Rider OG showcased, but enhanced with a second layer of frost! Expect a solid OG, and a pungent aromatic funk. Phenomenal for the nostrils!!! Starfighter mixes genetics from Alien Tahoe OG and Lemon Alien Dawg to create a sweetly aromatic, uplifting hybrid that boasts its potency with a sparkling coat of star-like trichomes.

Kimbo Kush

Type: Indica-dominant hybrid

Lineage: Blackberry Kush x Starfighter F2

Seed Company: Exotic Genetix

Appearance: Dark green and bright purple.

Flavor: Berries.

Effects: Heavy physical effect. Night time smoke!

Medicinal Effects: Stress, spasms.

Notes:

With Kimbo the idea was to take the beautiful and potent Platinum Blackberry Kush and combine it with the Frost on frost of the F2 male. Mission accomplished. The results range from dark and frosty to darker and frostier! She has nice sturdy colorful flowers and adds an additional element of frost appeal. Mostly hearty berry flavors and smells, while keeping the power of stone in tact with this heavy hitter.

Jack Skellington

Type: Hybrid

Lineage: Killer Queen x Jack The Ripper

Seed Company: TGA Genetics

Scent: Cherry, fruits, slight hazy lemon

Flavor: Limes, astringent, fruity, slight Haze influence and the unmistakable G-13 flavor.

Effects: Intense and strong mind numbing potency, instant euphoria and mental clarity, introspective and creative even through the mental confusion that comes with the potency.

Medicinal Effects: Stress, IBS

Notes:

Jack Skellington by TGA Genetics is a 70% sativa cross between Killer Queen and Jack the Ripper. TGA sought out the most resin-heavy phenotypes of each parent for an ideal, crystal-coated offspring. With a fruity citrus and diesel aroma, Jack Skellington promises an intensely psychoactive experience that brings creativity and introspection to a new level.

Light Saber

Type: hybrid

Lineage: Starfighter F1 x Predator Pink

Seed Company: Exotic Genetix

Scent: Very sweet berry, hint of grape

Effects: Appetite and stomach soothing, strong body effects

Notes:

Flavorful and covered in trichomes this strain is truly beautiful. The buds range in color from green to pink to purple and smell as good as they look. Very balanced smoke that can be enjoyed at any time of the day.

Captain Cook

Type: Hybrid

Lineage: Girl Scout Cookies x Mr. White (The White x Bubba Kush x OG Kush)

Seed Company: Exotic Genetix

Appearance: Purple and Neon Green.

Scent: Sweet, and Earthy.

Flavor: Berries, and Earthy.

Effects: Full body relaxation, Sleepy, Euphoric.

Medicinal Effects: Stress, Insomnia, Severe Pain, Appetite Loss.

Notes:

Captain Cook has it all. It is a very sweet and earthy tasting strain. The Girl Scout Cookies color and style really comes out in this strain. Spear shaped buds that are completely covered in resin. The Mr. White part in the strain just adds on top of that frost. This is a very heavy hitter!

G13 Skunk

Type: Indica Dominant

Lineage: G13 x Skunk #1

Company: Mr. Nice

Aroma: Skunk and pine

Effects: Mild, mostly body high

Notes:

Yet another one of our old school varieties. The Skunk #1 in this cross brings with it that trademark skunk smell everyone remembers. Add that with the G-13's potency and you get a perfect balance of flavor and strength.

CBD Mix

Type: Mostly Indica

Seed Company: CBD Crew

Scent: Earthy, spicy, oranges

Notes:

Our mix of CBD specific cannabis was created by some of the world's top breeders.

White Knuckles

Type: Hybrid

Lineage: Kimbo Kush x Mr. White

Company: Exotic Genetix

Appearance: large round resin coated nugs

Scent: Creamy Hash with a bit of a pungent bite

Flavor: Hashy but sweet

Effects: Lethargic, sedation

Medical Benefits: Sleep aide, anxiety, muscle spasms

Notes:

White Knuckles is a wonderful combination of new and old schools. The old school Blackberry Kush grandmother to this hybrid lends her sweet berry undertones and her huge trichome heads. While the Mr. White father adds the new school pungent aromas and its amazing trichrome production. A great nighttime smoke for anyone with muscle spasms or trouble sleeping.

IGH Kush

Type: Indica

Lineage: Pakistani Chitral Kush x Chemdawg DD Garlic

Appearance: Purple hues.

Scent: Garlic, berries, citrus.

Flavor: Fruity, Garlic.

Effects: Relaxed, Sleepy, Euphoric.

Medicinal Effects: Anxiety, Pain, Insomnia.

Notes:

IGH Kush is a cross of Pakistani Chitral Kush and Chemdawg DD Garlic. It is a very heavy indica leaning strain. This strain is appreciated for its advanced resin production. IGH Kush emits a diverse bouquet of aromas ranging from earthy caramel to sweet notes of fruits and berries. This strain provides a powerful relaxing body effect that helps to avoid anxieties and pain, as well as inducing sleep when needed.

Night Terror OG

Type: Hybrid

Lineage: Blue Dream x Rare Dankness #1

Seed Company: Rare Dankness

Appearance: Dense purple flowers.

Scent: Pine and spices.

Flavor: Light blueberry on the inhale, OG earthy floral on the exhale.

Effects: Full body high.

Medicinal Effects: Pain, insomnia, Chemotherapy, Gastrointestinal Issues, AIDS, Glaucoma, and PTSD.

Notes:

Taking the Blue Dream genetics and crossing it with RD#1 OG gives one an experience of a nice full-body high from the OG side, but with a cerebral experience from the little sativa influence left in it. Being a hybrid, you get the best of both worlds with this strain. The effect is instant, long lasting, with that classic OG lift. The hit starts with a lite, ever so lite, blueberry/fruity inhale, with the Classic OG Kush on the exhale.

Outlaw Orange

Type: Hybrid

Lineage: AE77 Cali O x Mt. Rainier

Seed Company: Redeyed Genetics

Scent: Orange rinds.

Flavor: Oranges

Effects: Mellow body high

Medicinal Effects: Depression and stress

Notes:

Outlaw Orange is RedEyed Genetics take on the Orange Terpene profile. AE77 Cali-O is known for its unprecedented orange rind smell and taste. AE77 Cali-O is a great medical strain for depression and stress with a nice mellow high. Our goal in crossing the Mt. Rainier to the AE77 Cali-O is bring the orange terpene profile over to the super stable frosty Mt. Rainier gene pool. We also are expecting the Mt. Rainier to increase the structure on the AE77 Cali-O taking her from a single cola plant to a bushier plant.

Green Ribbon BX

Type: Hybrid

Lineage: Green Ribbon x The Hulk

Seed Company: Exotic Genetix

Appearance: Light green buds.

Scent: Fresh squeezed limes.

Flavor: Earthy, Fruity.

Effects: Energetic, heady feeling.

Medicinal Effects: Depression, creativity.

Notes:

Green Ribbon is a 50/50 hybrid that tends towards the sativa side when it comes to effects; patients report an energetic, heady feeling when using it. Originating in San Jose, California, this strain includes some Green Crack but the status of the other parent is unknown, with Trainwreck, Afghanica, and White Rhino all contenders. The light green buds have a subtle floral scent and are slightly fruity, lending to an earthy taste. Green Ribbon generally has a high THC content around 18-20%.

Bullfighter

Type: Hybrid

Lineage: Afghani Bullrider x Starfighter F2

Seed Company: Exotic Genetix

Effects: Very heavy head rush, creativity.

Medicinal Effects: Insomnia, Chronic Pain, and Anxiety.

Notes:

Bullfighter is pretty to look at, with light green buds covered in orange hair, and has a strong sweet and sour smell with some piney freshness. This strain is a heavy hitter that delivers a strong body without the full sedative effects some indicas can have; it heads straight to the brain and may boost creative thoughts while providing physical relaxation. With its high levels of THC Bullfighter is recommended for chronic pain, insomnia, and anxiety.

El Jefe

Type: Indica-dominant hybrid

Lineage: Abusive OG x RD1

Seed Company: Rare Dankness

Appearance: Dense buds and bright orange hairs.

Scent: Spicy lemons, Hash.

Effects: Mental punch and full body high.

Medicinal Effects: Pain relief, Insomnia, Chemotherapy, Gastrointestinal Issues, AIDS, Glaucoma, Cancer.

Notes:

Rare Dankness El Jefe is a full on Hash and Kush taste and scent, with a note of spicy lemon/pine. Has a potent high that packs a mental punch as well as a full body high. Has a very dense bud structure.

G13 Skunk

Type: Indica Dominant

Lineage: G13 x Skunk #1

Company: Mr. Nice

Aroma: Skunk and pine

Effects: Mild, mostly body high

Notes:

Yet another one of our old school varieties. The Skunk #1 in this cross brings with it that trademark skunk smell everyone remembers. Add that with the G-13's potency and you get a perfect balance of flavor and strength.

Scott's OG

Type: Hybrid

Lineage: Triangle Kush x RD1

Seed Company: Rare Dankness

Scent: Lemon kush, Pungent citrus.

Effects: Extremely potent, Euphoric.

Medicinal Effects: Body pain, appetite, headaches, and insomnia.

Notes:

A fanatic resinous flower producing strain. The beautiful flowers produces a wonderful pungent lemon/kushy smell. Is extremely potent, not for the lite user.
